YaCy is an open-source, community-driven search engine that was designed to be a hybrid of the centralized model, used by Google and others, and the decentralized model, used by BitTorrent and others. YaCy is hosted by a non-profit organization and offers several free services that include the YaCy browser and the YaCy desktop search application. The search engine can be downloaded from [www.yacy.net](http://www.yacy.net). YaCy uses search results indexing to retrieve and display the links to search results in a web browser, rather than the index files themselves, which keeps bandwidth usage down. It is meant to be used by anyone, anywhere. Besides indexing the web, YaCy can be used to search torrents and index torrent metadata. It can be easily downloaded from [www.yacy.net](http://www.yacy.net). Simple Search is a handy search engine for a specific part of a webpage or a set of related documents. It is similar 82157476af
